Valuable Information

photographs taken by the Royal Canadian Air Force in peace time are of valuable to administration of

the natural resources, the development of mines and resources has started.

Distribution of forest types and estimates of existing timber quantities of certain lands of Cape Breton determined by a map prepared by R.C.A.F. photographs of 1939, could have meant indefinite postponements of wartime use to wait completion of a forest survey on ground.

The department said that with air photographs the forester now has at his fingertips a small-scale likeness of the distant forest lands. The hills and valleys are visible under the microscope and recently developed techniques and equipment make it possible to interpret the detail provided by the photographs.

By means of air photographs of certain forest surveys have been

in many parts of Canada from the Atlantic to the Pacific and north to the Yellowknife region and Slave-Lake.

When supplementary ground work necessary the air photographs enable it at a minimum of time and cost.

Canada's first corvette was the *Hydya*, a wooden steam vessel used by the British government for surveying purposes.

One of the oldest forms of food is fish, which has been made and eaten as early as 1400 B.C.

Relieves MONTHLY

FEMALE PAIN

Women who suffer pain of irregular periods with crampy headaches—use to monthly functional disturbances—should find Lydia E. Pinkham's Vegetable Compound Tablets with added iron, very effective to relieve such distress. Pinkham's Tablets made especially for women help to ease up nervous system, soothe annoying symptoms. Follow label directions. Made in Canada.

WORLD HAPPENINGS
BRIEFLY TOLD

Doubling of the area planted to potatoes in 1942 to a total of nearly 50,000 acres and help meet vegetable oil and food requirements for the 1942-43 agricultural department officials said.

A historic group of the minutes of meetings held by the original International Workmen's Association in 1869 in London, moved to Britain. The original is stored in the vaults of a bank.

It has been estimated that one of every 10 domestic radio sets in Britain can be used not because of a shortage of valves, batteries and skilled labor.

Harvest and other historic boy's schools are employing women teachers for the duration. They are mostly young women just out of university and others from girls' schools.

Twenty-one British Columbia Japanese families who arrived from the Pacific coast are now settled on farms on the Lethbridge northern frontier.

War Secretary Sir James Grigg, who rose to cabinet rank from the House of Commons from East Cardiff.

U.S. states where men will go to work on the Alaska highway are camped under canvas on a plateau overlooking White Horse.

New food restrictions, among other things halving the sugar allowance in eating places, will go into effect in Switzerland.

Commander Sir Alastair Lake has arrived to become chief of the New Zealand naval staff, succeeding Commander W. E. Parry.

South African Women

Am-Fencing Exhibit As Spectacle

South African women on active service in the British command are proving themselves as fine fencers as their brothers and are in the hands of experts in the battle of Libya.

They are the women specialists attached to the coast artillery batteries in the Cape Peninsula. Their handling of the delicate and complicated instruments on which depend the efficiency of the big guns.

The coast has allotted the highest prize from South Africa's best artillerymen.

So efficient, indeed, have these women proved themselves that the authorities have decided to enlist a further 500 or 400 women for training in the work which is a new and highly important nation. In view of the fact that the British Indian ocean, to which Prime Minister Churchill referred in parliament this week has now taken a new turn.

Women practice shoots from a Simon's Town battery provided these women specialists with a real test of skill, and it was in the first seven because the practice awards took the form of a small trophy.

It was the first time that the experiment associated with the big guns had been tried anywhere in the British Commonwealth, and it proved an outstanding success.

SO YOU'RE GOING
TO DO A PLAY?

Time Limit

By this time you are beginning to get some parts and rhythm in your work and several weeks ago and the actors are now taking a new turn.

Simon's Town battery provided these women specialists with a real test of skill, and it was in the first seven because the practice awards took the form of a small trophy.

Cosmos Clock Reaches The Acute

Frank J. Schuler, Minneapolis jeweler, can follow news with a unique "world clock" which reveals time accurately to within a fraction of a minute anywhere in the world. The electrically operated clock is encased by white hands to denote hours, minutes and seconds.

The top hand represents the minute hand, the bottom one the hour hand, while the center hand is "set" for the locality in which one lives. Time is read merely by noting where vertical line from any particular point on the map intersects the hands. The year, month and day, whether a m or p.m., and the difference between time of two parts of the globe are shown on the globe's surface.

Schuler's homemade clock is the only one of its kind in the world.

No More Fancy Stoves

Watson Specifications Ordered To

Save Needed Iron And Steel

To save iron and steel, and effective at once, cancellation of stove production in Canada has been ordered and all stoves manufactured after present stocks of parts are exhausted will have to conform to rigid war-time specifications, it was announced by the munitions supply department.

The new order provides that no stove, other than approved model, can be manufactured after Jan. 1, but manufacturers will be permitted to complete fabrication and assembly of stoves now in process of manufacture.

The trade of 1943 may get something of a shock when she sees her new stove. It was said. "Built for better rather than for appearance, the new models will be cooking and heating machines and nothing more."

Lettors To Troops

Overcome Men Brevity An Average

Of Ten Letters A Month

On the average Canadian soldiers, sailors and airmen serving overseas receive somewhere in the neighborhood of 10 letters a month, not speak of piles of parcels and newspapers from home, figures released by the munitions supply department.

During March the letter mail worked out at about 307,600 letters a week, or 45,600 a day. Assuming there are something over 100,000 men overseas the average letter mail per man each month works out around 10 letters.

Greatly Appreciated

Canadian Parole And Letters Are

Unsuspectingly from after months of captivity in enemy prison camps. Some of the most interesting and revealing of British-held prisoners told the story of their life in the hands of the enemy.

A New York Times dispatch said that several prisoners of the Canadian Red Cross which sent them letters and parcels. The Times quoted one sergeant as saying: "I don't know what I would have done without those parcels."

The Italian watchword, they decided, was "humor!" They told of their prohibition when, finally, they had been in British hands. Most of them had been in the hands of the big Nazi push in Libya last year.

We were like kids at a Christmas party when we boarded the Canadian ship. We were treated as if we were being sent to the British transfer ship. There was no more cigarettes, beer and food everywhere. We didn't know what to do for fear.

Another sergeant told of having been taken to a German prison camp. He said he was treated as a fall—although somehow, gradually the truth seeped through. But he said, "I still will take a lot of time to get our bearings again."

Another sergeant told of having been taken to a German prison camp. He said he was treated as a fall—although somehow, gradually the truth seeped through. But he said, "I still will take a lot of time to get our bearings again."

Five Main Factors Of The Business Of Farming

Approximately 5,000 annual accounts are given in cooperation with the analysis through the recent Ontario Dairy Farm Management survey, and a study of them has revealed business principles which, when applied, point the way to more successful farm operation. For a farmer to secure good financial returns, it is necessary that he should be able to manage his business in relation to five farm business factors.

(1) efficiency in the use of land; (2) efficiency in the use of stock; (3) efficiency in the use of capital; and (4) efficiency in the use of labor.

And, as a result, the farmer is prompted to suggest that it reveals the importance of the five factors: land, stock, capital, labor, and management.

Three invocations of the five factors, it is all that is necessary. These invocations are given at three week intervals, and a reinforcing dose—after an interval of three weeks—of the five factors is given at three week intervals.

Three invocations of the five factors, it is all that is necessary. These invocations are given at three week intervals, and a reinforcing dose—after an interval of three weeks—of the five factors is given at three week intervals.

Health LEAGUE presents CANADA VITAL INTEREST

PREVENTING DIPHTHERIA

Health authorities through Canada are united in co-operation with the Health League of Canada in a nationwide effort to attract attention to the importance of immunizing children against diphtheria.

Diphtheria, unfortunately according to the Health League of Canada, is the greatest cause of death among children between the ages of two and five. There has been developed a preventive in the form of Toxoid. The process of preventing diphtheria is a simple one, not attended by any danger, nor any great inconvenience.

Three inoculations of diphtheria Toxoid, is all that is necessary. These inoculations are given at three week intervals, and a reinforcing dose—after an interval of three weeks—of the five factors is given at three week intervals.

Nevertheless, among these voices are to be heard some who advocate an outright negative, and others adopting a neutral attitude. As regards those last, it may as well be bluntly stated that in the present struggle there is no room for neutrals in our midst. Moreover, for both these classes it is only fair to remind them that those who are not with Canada today will surely be reckoned to be against her. Worse, they are actually assisting the enemy to the detriment of our fighting force.
